## AA SCREENING DETERMINATION

Of Garryduff Bog, Co Galway - Decommissioning and Rehabilitation Plan (the “**Project**”)

In accordance with Article 6(3) of the EU Habitats Directive (Directive 92/43/EEC) (“**Habitats Directive**”) and Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations 2011 as amended (“**Habitats Regulations**”), Bord na Móna has undertaken Appropriate Assessment (“**AA**”) screening to assess, in view of best scientific knowledge and the conservation objectives of the European Site(s), if the Project, individually or in combination with other plans or projects is likely to have a significant effect on a European Site(s).

Regulation 42(1) states “A screening for Appropriate Assessment of a plan or project for which [...] a public authority wishes to undertake [...] shall be carried out by the public authority to assess, in view of best scientific knowledge and in view of the conservation objectives of the site, if that plan or project, individually or in combination with other plans or projects is likely to have a significant effect on the European site.”

In this context, particular attention was paid to the European Site(s) listed below:

- River Shannon Callows SAC;
- Fin Lough (Offaly) SAC;
- Mongan Bog SAC;
- Pilgrim’s Road Esker SAC;
- Redwood Bog SAC;
- Glenloughaun Esker SAC;
- Moyclare Bog SAC;
- All Saints Bog and Esker SAC;
- Ardgraique Bog SAC;
- Ferbane Bog SAC;
- Ridge Road, SW of Rapemills SAC;
- Castlesampson Esker SAC;
- Middle Shannon Callows SPA;
- River Suck Callows SPA;
- Mongan Bog SPA;
- River Little Brosna Callows SPA; &
- All Saints Bog SPA.

Regulation 42(2) “A public authority shall carry out a screening for Appropriate Assessment under paragraph (1) before consent for a plan or project is given, or a decision to undertake or adopt a plan or project is taken.” Having taken the view that the activity required for the Decommissioning and Rehabilitation of Garryduff Bog, Co Galway might constitute ‘projects’ within the meaning of the Habitats Regulations, Bord na Móna decided that the activities required should be subject to screening for AA pursuant to Regulation 42 of the Habitats Regulations and Article 6(3) of the Habitats Directive.

Tom Donnellan, CEO Bord na Móna, delegated the function of making the determination of the screening for AA to Bord na Móna’s Company Secretary and General Counsel on the 5th May 2021.

## Bord na Móna

In performing this determination of the screening for AA, I had regard to information contained in the following documents:

- 1) MKO Planning and Environmental Consultants (“**MKO**”) Screening Report for Appropriate Assessment;
- 2) MKO Screening for Appropriate Assessment: Conclusion Statement;
- 3) Appendices to MKO Screening Report for Appropriate Assessment, which include Garryduff Bog, Co Galway Decommissioning and Rehabilitation Plan 2021.

In performing this determination of the screening for AA I also met with and discussed with the following members of staff from Bord na Móna, Doreen King, Project Manager and Chris Cullen, Ecologist and the following members of staff from MKO the Planning and Environmental Consultants engaged by Bord na Móna, Inga Reich & Pat Roberts.

Having performed screening for AA in respect of the specific activities required for the Decommissioning and Rehabilitation of Garryduff Bog, Co Galway in accordance with Regulation 42(7) Habitats Directive, I accept the recommendation of MKO, that following screening **“it is concluded beyond reasonable scientific doubt, in view of best scientific knowledge, on the basis of objective information and in light of the conservation objectives of the relevant European Sites, that the proposed works, individually or in combination with other plans and projects, will not have a significant effect on any European Site.**

**It is acknowledged that, following D & R, the presence of an undisturbed wetland habitat the size of Garryduff Bog, may provide foraging opportunities, attract wildfowl species as a refugium, and/or act as a disturbance buffer to birds utilising the River Suck and Shannon corridors. These positive quality effects may ultimately positively impact the SCIs and benefit the Conservation Objectives of the adjacent SPAs. For the avoidance of doubt however, this is not considered in the evaluation above, nor is any reliance placed on this in the consideration of effects.”**

Therefore, Bord na Móna hereby determines that, following screening, an AA is not required for the Project as it is not directly connected with or necessary to the management of any Site(s) as European Site(s) and as it can be concluded, on the basis of objective information, that the project, individually or in combination with other plans or projects is not likely to have a significant effect on any European Site(s) listed above.
