

19th August 2021

APPROPRIATE ASSESSMENT OF SPECIFIC WORKS

Cutaway Bog Decommissioning and Rehabilitation Plan – Castlegar Bog, Co. Galway (the “Project”)

REASONED DETERMINATION

Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations, 2011 (the ‘Habitats Regulations’) states, *inter alia*, ‘A screening for Appropriate Assessment of a [...] project [...] which a public authority wishes to undertake [...] shall be carried out by the public authority to assess, in view of best scientific knowledge and in view of the conservation objectives of the site, if that [...] project, individually or in combination with other plans or projects is likely to have significant effects on the European site.’ Regulation 42(2) of the Habitats Regulations states ‘A public authority shall carry out a screening for Appropriate Assessment under paragraph (1) before [...] a decision to undertake [...] a project is taken.’

Having taken the view that the activity required for the Project might constitute ‘projects’¹ within the meaning of the Habitats Regulations, Bord na Móna plc (“BNM”) decided that the activities required should be subject to screening for Appropriate Assessment (“AA”) pursuant to, *inter alia*, Regulation 42 of the Habitats Regulations and Article 6(3) of Council Directive 92 /43 /EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (the “Habitats Directive”).

Tom Donnellan, CEO Bord na Móna, delegated the function of making the determination of the screening for AA to Bord na Móna’s Company Secretary and General Counsel on the 5th May 2021.

In performing this determination of the screening for AA, I had regard to information contained in the following documents:

- 1) Jennings O’Donovan & Partners Limited Appropriate Assessment Screening Report and Conclusions Statement; &
- 2) Appendices to Jennings O’Donovan & Partners Limited Appropriate Assessment Screening Report, which include Castlegar Cutaway Bog Decommissioning and Rehabilitation Plan 2021.

In performing this determination of the screening for AA I also met with and discussed with the following members of staff from BNM, Doreen King, Project Manager and Chris Cullen, Ecologist and Pat Doherty, Dr Monica Sullivan and David Kiely from Jennings O’Donovan & Partners Limited, the Planning and Environmental Consultants engaged by BNM.

¹ The Habitats Regulations contain a broad definition of “project” to include any “land use or infrastructural developments, including any development of land or on land”. Although the decommissioning and rehabilitation activity are exempted developments under the Planning and Development Acts 2000-2011, Bord na Móna acknowledges the activity might constitute a ‘project’ within the meaning of the Habitats Regulations.

Bord na Móna

Having performed screening for AA in respect of the Project in accordance with Regulation 42(7) of the Habitats Regulations, I accept the recommendation of Jennings O'Donovan & Partners Limited that "Following screening it can reasonably be concluded that there is no likelihood of significant effects to 12 of the 14 relevant European Sites because of the proposed project, either alone or in combination with other plans or projects. Therefore, the potential for significant effects on 12 European Sites has been excluded, and have been 'Screened Out' from the Appropriate Assessment process and no Appropriate Assessment is required for these European Sites.

Following screening for AA, it can reasonably be concluded that there is a likelihood of significant effects to 2 of the 14 relevant European Sites as a result of the proposed project, either alone or in combination with other plans or projects. Therefore, the potential for significant effects on these 2 European Sites has not been excluded, and Appropriate Assessment of the Project is required in respect of the following 2 European Sites

- River Suck Callows SPA
- Middle Shannon Callows SPA

Accordingly, under and in accordance with Regulation 42(6) of the Habitats Regulations I determine that an Appropriate Assessment of the Project is required in respect of :

- River Suck Callows SPA
- Middle Shannon Callows SPA

Regulation 42(9) of the Habitats Regulations states *'Where a public authority is required to conduct an Appropriate Assessment [...] it shall- (a) prepare a Natura Impact Statement, (b) compile any other evidence including, but not limited to, scientific evidence that is required for the purposes of the Appropriate Assessment, and (c) submit a Natura Impact Statement together with evidence compiled under subparagraph (b) to the Minister not later than six weeks before it proposes to adopt or undertake the plan or project to which the Natura Impact Statement and evidence relates.'*

Jennings O'Donovan & Partners Limited were instructed to prepare a Natura Impact Statement (to include all evidence including, but not limited to, scientific evidence that is required for the purposes of the Appropriate Assessment) in respect of the Project. That Natura Impact Statement has the title ***Cutaway Bog Decommissioning and Rehabilitation Plan, Natura Impact Statement, Castlegar Bog, Co. Galway.***

On 16th April 2021 BNM submitted that Natura Impact Statement to the Minister for Culture, Heritage and the Gaeltacht (in whom the relevant functions were vested at the time).

Regulation 42(10) of the Habitats Regulations states, *inter alia*, *'A public authority [...] shall not, without the agreement of the Minister, conclude an Appropriate Assessment [...] earlier than six weeks after the date on which it submitted the Natura Impact Statement to the Minister.'*

I confirm that the period of six weeks mentioned in Regulation 42(10) has passed.

Regulation 42(10) of the Habitats Regulation states, *inter alia*, *'A public authority [...] shall take account of any submissions made to it by the Minister.'*

I confirm that observations were received from the Minister dated 17th May 2021 and BNM have taken account of those submissions made to it by the Minister.

Bord na Móna

Regulation 42(13)(a) of the Habitats Regulations states *'Where a public authority has determined, pursuant to paragraph (6), that an Appropriate Assessment is required in respect of a proposed plan or project, and before making a determination on the matter pursuant to paragraph (11), the public authority shall carry out a public consultation and publish a notice of the proposed plan or project in a manner to be determined by the public authority..'*

Bord na Móna did carry out the required public consultation, including by publication of a notice of the proposed activities and inviting submissions or observations. The time for the consultation period has passed. Bord na Móna has received 1 submission in response. The submission received is listed in the Schedule hereto. Bord na Móna has had regard to the submission or observations received during that public consultation in accordance with Regulation 42(13)(a) of the Habitats Regulations.

In addition, Bord na Móna have actively engaged with a broad range of stakeholders, through a range of different communication tools and media for stakeholder engagement including meetings (virtual and face to face where Covid restriction permitted), public advertisements, and a dedicated webpage with contact details of the liaison officer.

Regulation 42(11) of the Habitats Regulations states *'An Appropriate Assessment [...] shall include a determination by the public authority [...] pursuant to Article 6(3) of the Habitats Directive as to whether or not a plan or project would adversely affect the integrity of a European site and the assessment shall be carried out by the public authority before a decision is taken to approve, undertake or adopt a plan or project, as the case may be.'*

Under and in accordance with Regulation 42(12) of the Habitats Regulations, in performing this determination of the AA, I have taken into account:

- (a) the Natura Impact Statement prepared by Jennings O'Donovan & Partners Limited, including the recommendation contained therein that "given the application of prescribed protective measures for the avoidance of impacts and the implementation of the required mitigation measures, the proposed development will not give rise to adverse effects on the integrity of any of the identified European sites evaluated herein."
- (b) any other plans or projects that may, in combination with the Project, adversely affect the integrity of a European Site, which are included within the Natura Impact Statement;
- (c) the supplemental information furnished in relation to the Nature Impact Statement;
- (d) the observations received from the Minister;
- (e) the submission received, as listed in the Schedule hereto;
- (f) the information or advice obtained, namely, BNM staff Doreen King, Project Manager and Chris Cullen, Ecologist and Pat Doherty, Dr Monica Sullivan and David Kiely from Jennings O'Donovan & Partners Limited the consultant engaged by BNM to prepare Screening Report for Appropriate Assessment and Natura Impact Statement.

Regulation 42(17)(b) of the Habitats Regulations states, *inter alia*, *'A public authority shall not [...] undertake [...] a [...] project containing any conditions, restrictions or requirements purporting to-*
(i) permit the deferral of the collection of information required for a screening for Appropriate Assessment or for an Appropriate Assessment or the completion of a screening for Appropriate Assessment or an Appropriate Assessment until after the consent has been given, (ii) accept an incomplete Natura Impact Statement, or (iii) permit or facilitate the avoidance of compliance with the conditions set out in Article 6(4) of the Habitats Directive.'

I confirm that the proposed Project and this determination do not contain any such conditions, restrictions or requirements.

Bord na Móna

I accept the recommendations of Jennings O'Donovan & Partners Limited in assessing the Project, that "given the application of prescribed protective measures for the avoidance of impacts and the implementation of the required mitigation measures, the proposed development will not give rise to adverse effects on the integrity of any of the identified European sites evaluated herein." I am satisfied that the prescribed protective measures and required mitigation measures are effective and trusted measures sufficient to eliminate reasonable scientific doubt.

Pursuant to Regulation 42(11) of the Habitats Regulations and Article 6(3) of the Habitats Directive, I determine, in view of the best scientific knowledge and the site's conservation objectives, that the proposed Project, individually or in combination with other plans or projects, would not adversely affect the integrity of any European site.

I confirm that this determination has been made before any decision has been taken to approve, undertake or adopt the Project.

I am satisfied that BNM is not prohibited, by Regulation 42(16) of the Habitats Regulations, from undertaking the Project.

NIS PUBLIC CONSULTATION
CASTIEGAR BOG

TO WHOM IT MAY CONCERN,

I have read your notice on the Connacht
Tribune paper about works on these bogs.
I have farm land running into English-
Annakee Bog and these drains are the
main source of draining our lands as our
flow of water goes through the boundary of
these bogs with your proposed works will this
cause flooding on my lands or restrict the
flow of water from these lands.

yours Sincerely
Michael Curley
